# QUINCY MASSACHUSETTS

## *Departmental Reports*

*For The Year*

# 1950

This book was prepared, written and edited under the direction of the office of the City Manager. A large part of the text is based on data and information gathered from the annual reports of the various municipal department heads.

## *Preface*

This is the story of municipal government in Quincy, Massachusetts, during the year 1950.

Now a progressive and prosperous city of more than 83,000 inhabitants, Quincy is one of the historically richest cities in the United States. Settled in 1625, only five years after the Pilgrims came to Plymouth, Quincy soil has felt the footfalls of Captain John Smith and Myles Standish. Three of its native sons, John Adams, John Quincy Adams and John Hancock played principal roles in creating a new nation and shaping its early destiny.

The people of Quincy in this year of 1950 proved that they had kept alive and virile that fine heritage of political freedom handed down through the generations from the founding fathers. A century and three-quarters ago men of Quincy, together with other stout-hearted Colonials, had the courage to strike for a new form of government at the national level. This year the people of Quincy had the courage to try out a new form of government at the local level.

This year Quincy is operating for the first time under a Plan E charter, which has brought into effect the council-manager form of municipal government. It is not the function of this annual city report to express an opinion as to whether or not the new form is better than the old.

One thing is certain: if the majority of the registered voters prefer the new type of government, it will remain; if not, it will be replaced.

That is the American way—and the clear-thinking, freedom-loving men of Quincy were leaders in shaping the American way a hundred and seventy-five years ago.

## *Plan E Becomes Effective*

Plan E, the Massachusetts charter providing for the council-manager plan of municipal government became effective in Quincy on the first day of 1950 as a result of a popular vote of the inhabitants late in 1948 when they expressed their preference in its favor by an approximate two to one ratio. Plan E succeeded the Plan A charter which had operated in Quincy for many years.

The Plan A form of municipal government provided for the election of a mayor and a council of nine members, three at large and one from each of the six wards. The mayor had veto power as a check on the council and, in addition, substantial executive and administrative authority. Furthermore, through his function of preparing the annual budget, which the council could cut but could not increase, he could exert considerable influence in shaping the financial policy of the city government.

Plan E brought into operation the proportional representation form of voting at elections. Through this type of voting the registered voters elected a council of seven members, all serving at large. The council in turn elected one of its own members as mayor and another as vice chairman.

Under Plan E the mayor has no administrative or appointive powers over municipal department heads and no veto power: neither does he prepare the annual budget. He has a single vote as a member of the council. His functions are exactly the same as the functions of other members of the council save that he serves as its presiding officer and officially represents the city at formal occasions. In his absence the vice chairman presides. The mayor does, however, retain the authority to appoint standing and special council committees by virtue of his chairmanship.

Under Plan E the council elects a professional city manager who exercises practically all of the administrative and executive powers invested in the mayor under Plan A. He prepares the budget, which the council may cut but may not increase: selects department heads subject to appointment; has appointive and discharge powers over other municipal officials and employees. He has no veto power over legislation. It is his duty and function to carry out the policies shaped by the council under its power to appropriate money. The council is restricted by law from interfering with his administrative functions.

Quincy's first Plan E council elected as its mayor Thomas S. Burgin, who had topped the candidates by a wide margin in the election late in 1949. Mr. Burgin had served in the council in the General Court of Massachusetts and as Mayor of Quincy under the old charter. David J. Crowley, who had served as a ward councilor from Ward One, was chosen as vice chairman.

The new council had established the salary of mayor at \$4,000 and the salary of the councilors at \$3,000. Under the last years of Plan A the mayor had received \$6,000 and each councilor \$1,000.

The council chose as Quincy's first city manager William J. Deegan, Jr., who resigned from the city managership of Superior, Wisconsin, to accept the Quincy post; and the salary was established at \$13,500 a year.

Although his position was invested in wide-sweeping appointive powers, the new city manager made no changes in the department heads. Neither did he start out with a drastic reduction of the number of city employees. He did, however, inaugurate a policy of gradually reducing municipal personnel through the device of abolishing unnecessary positions as they became vacant through such causes as death, retirement, or resignation .

On the recommendation of the manager, the city council retained the services of Ernst and Ernst, consulting engineers, to make a management audit of the city government with a view of stream-lining the municipal machine in conformance with the theory and practice of the council-manager form of government. Late in the year the council effected many of the recommendations made by the consultants.

These changes included : regrouping of municipal departments for accounting purposes; combining the offices of city treasurer and city collector; creation of the job of deputy collector and director of the budget; establishment of the department of finance and creation of the position of director of finance; and creation of the position of business manager of the city hospital.

Earlier in the year the council, on the recommendation of the city manager, set up the legal department on a full time basis by substantially increasing the salary of the city solicitor and establishing the position of assistant city solicitor.

Much of the work of stream-lining the city government along lines consistent with the council-manager form of government fell upon the shoulders of the new legal department, as the transition necessitated the amending of many ordinances.

The smooth transition from one form of municipal government to a radically different form was largely due to the cooperation and support of the first Plan E council which, generally speaking, evinced a sincere desire to give the new municipal machine a fair chance to work successfully. Time after time individual councilors withdrew their objections to certain features of Plan E to keep from impeding its operation .

*City Manager, Quincy, Massachusetts*

# *The City Manager Speaks*

City Council  
Quincy, Massachusetts

The attached report summarizes the activities of the various departments of the City for the calendar year 1950.

This year has been diverted almost exclusively to the problems of adapting the municipal corporation to meet the requirements of the Council-Manager form of government. Significant accomplishments have been made in this respect.

In order to facilitate and speed up the process of adaptation, you made possible early in the year the employment of the firm of Ernst and Ernst who prepared a Management Analysis of the City of Quincy for your guidance. They also submitted in their report to you recommendations whose objectives were to streamline and expedite the establishment of modern business methods in the affairs of the City. It is significant that by the end of 1950, the majority of recommendations had been accomplished by the Council, many of which became effective with the beginning of the new fiscal year of 1951.

Several problems that have faced Councils in years gone by were taken up and their solutions begun. Notably from the public standpoint were such things as the reduction of the dump nuisance, the adoption of a revised planning law, the purchase of a modern sanitary and trash fleet, the purchase of sidewalk plows and other modern equipment designed to eliminate hard and costly hand labor and to speed up public works programs. Also undertaken was the beginning of the long-delayed and very essential school construction program designed to meet an increasing enrolment which is expected to reach its peak in 1958. It is regrettable of course that this program must be undertaken during a period of materials scarcity and inflation.

That our programs are forecasting substantial accomplishments for the years ahead is evidenced by the interest that the municipal bond market is giving to our security offerings and the increasingly attractive interest rates which are being bid for these bond issues. A continuation of this trend will greatly reduce the cost of our debt service and the ultimate cost to the taxpayers for interest on essential construction bonds which will be needed in the street, sewer, water and school programs.

I wish to take the opportunity of this report to thank the City Council, the city employees and the citizens of Quincy for their patience, consideration and cooperation in this conversion year. Without such assistance the conversion process would have taken substantially longer and would not have reached the position which now makes possible the accomplishments which we expect from the fiscal year 1951.

WM. J. DEEGAN, JR.,  
*City Manager*

## *The City Clerk*

The office of the city clerk keeps records of the three most important events in the lives of Quincy citizens: their births, their marriages and their deaths.

To the individual citizen these records are, of course, of paramount importance; but these recordings form but a comparatively small portion of the work carried on day by day in the clerk's office.

Elections and all matters relating to voting are handled by the clerk, and all materials and equipment needed in operating the polls and counting the votes in each of the 35 precinct polling places are prepared, set up and supervised by this city official. Furthermore, the clerk, working in co-operation with the board of registrars, is responsible for the registration of voters and preparation of the voting lists.

Other functions of this office include: recording of personal property mortgages, bills of sale and mortgage discharges; issuances of dog license, hunting and fishing licenses; issuance of shell fish licenses; and, in addition to all these duties, the city clerk also acts as Workmen's Compensation agent for the city employes.

Much information about the people of Quincy during the year 1950 is reflected in compact form in the following statistical table compiled from records kept by the city clerk:

#### RECORDS FOR 1950

Births recorded	2,307
Marriages recorded	1,059
Deaths recorded	972
Number of Registered voters	45,186
Dog licenses issued:	
Males	1,966
Females	187
Spayed females	1,122
Kennels	14
Fishing licenses issued	1,357
Hunting licenses issued	514
Sporting licenses issued	403
Trapping licenses issued	7
Clam licenses:	
Commercial	140
Resident	1,034
Non-resident	589

## *Quincy Legal Department*

For the first time in the history of the city the Quincy legal department was placed on a full time basis in 1950.

From the beginning of the year, which brought into effect the new council-manager form of government, it was evident that with the centralization of administrative powers in a city manager a great degree of legal safety in the prosecution of the affairs of the city would be desirable. The council, therefore, created the position of assistant to the city solicitor.

The department not only carried on the routine duties of advising the city manager and council and handling legal matters during the year but also spent much time in laying the legal foundation for a drastic revision of the Revised Ordinances deemed necessary for the new form of municipal government. These changes demanded careful interpretation and advice in the administration of laws applicable to the new form of government.

The revision of the city ordinances in light of the new charter concepts was a challenge which was met by the city council in accepting many changes recommended by the legal department. With the institution of a full time department, additional duties were placed on the shoulders of the city solicitor and his assistant. Under the new system he represents the city in all Workman's compensation cases, welfare cases, tax appeal cases and tax title cases and other matters which were formerly placed in the hands of outside attorneys.

During the year the number of cases against the city was substantially reduced by trial and disposition.

City Solicitor Arthur I. Burgess dictates to Secretary as Ass't City Solicitor Douglas A. Randall looks up Law

## *Police Department*

The Quincy police department, responsible for the protection of the life, limb and property of citizens, is headed by Chief Joseph F. Hughes who completed in 1950 his first full calendar year as chief. Under him are four captains, eight lieutenants, ten sergeants, 112 patrolmen, one policewoman, a custodian, a clerk, and a radio technician.

During the year members of the department arrested 2,513 persons, of which 2,299 were males and 214 females; and 2,257 were native born and 256 were foreign born. Most arrests were made in August with 362, and the least in February with 115.

During the year the traffic bureau recorded 608 traffic accidents, 554 persons injured and five killed. The bureau brought 1,214 motorists into court, issued warnings to 1,639 violators and tagged 8,932 cars.

The juvenile bureau brought 134 youngsters into juvenile court; recovered property taken by juveniles valued at \$1,826.80 and made restitution to owners to the amount of \$1,272.38.

The bureau of investigation investigated 376 breaks, 65 deaths, 384 larceny cases, 35 robbery cases and 1,411 miscellaneous cases. Stolen property valued at \$80,649.33 was recovered by the members of the bureau.

The liquor bureau made 9,826 inspections, investigated 76 complaints, held six hearings before the license commission, and brought 19 cases into court. One liquor license and one store license were suspended during the year.

The shellfish constable, working under the direction of the chief of police, reported the issuance of 1,703 clam digging permits, prosecuted 21 cases in court and revoked the permit of one shell fisherman.

The police made 1,226 wagon calls and 469 ambulance calls during the twelve months.

Multi-purpose vehicle ordinarily used as a prowler car can be converted to ambulance in a few seconds and save valuable time in rushing accident victims to hospital. Three new machines acquired by Police Dept. in 1950 proved their worth in a few months.

## *Quincy Fire Department*

Fire losses for Quincy, according to the figures of the Quincy Fire Department, for 1950 were \$364,531, of which \$250,407 represented the damages to buildings and \$114,124 to their contents.

During the year the department responded to 2,159 alarms. There were 375 fires in buildings; 729 blazes involving grass, rubbish or brush; 113 in vehicles; 9 blazes involving gasoline or oil, and 241 miscellaneous fires. Members of the department made 99 runs for rescue or emergency purposes; and responded to 121 false alarms and 54 accidental alarms.

Fire losses involved 265 homes, 90 mercantile buildings and 20 manufacturing buildings. Value of buildings involved in blazes was \$2,031,138, and the value of contents so involved was \$576,695.

During the year Quincy firemen raised 6,607 feet of ladders and laid 172,350 feet of hoseline.

Of 19 fires investigated, 1 was characterized as of suspicious origin, 12 of undetermined origin and six were found to be of incendiary origin.

# NEW AERIAL ADDED TO FIRE DEPARTMENT

Seventy-five foot Seagraves Ladder will aid Quincy fire fighters in battling blazes in commercial structures and multi-story residential property.

## *Welfare Department*

The Quincy department of public welfare is divided into three divisions: general relief, aid to dependent children and old age assistance. Administration of general relief, aid to dependent children and the city home, a sub-division of general relief, is carried on from the central office at 117 School street; while old age assistance is administered from the offices on the third floor of the Quincy Savings Bank building, Quincy Square.

The staff of the department consists of 39 persons. They include a commissioner, two supervisors, two principal clerks, 14 social workers, four senior clerks, twelve junior clerks, a chauffeur, the superintendent of the city home, a cook and an institutional worker.

### *General Relief*

The division of general relief handles all problems and cases which cannot be handled in the old age assistance and aid to dependent children divisions. Problems arising out of unemployment, illness, intoxication, divorce, desertion, separation, strikes, death and similar causes of social maladjustment confront this division.

During 1950 the city's largest industry, the Fore River shipyard, and numerous smaller industries operated on a fairly large scale, so that unemployment did not constitute a serious problem.

During the year the bulk of the problems coming to General Relief resulted from marriage crack-ups, desertion, non-support and the like rather than from lack of job opportunities. Illness also was a contributing factor. By the end of the year the division was dealing almost exclusively with the unemployables, the sick, the infirm and the incorrigibles and their dependents.

General Relief was called upon to handle 1077 new cases, including 484 new applicants from the city, 174 cases from other municipalities and 419 cases from the city hospital. On January 1. there were 309 active cases on General Relief while at the end of the year there were 274, a decrease of 35. The total expenditures were \$215,874.61. The city received from all sources receipts of \$59,645.05, leaving a net cost to the city of \$156,229.56 as against a net cost in 1949 of \$169,688.44.

It must be kept in mind that the average number of persons in a General Relief family is five; so that approximately 5,300 needy persons came to the division for assistance during the year. Under present laws the General Relief division is the only division of public welfare having elasticity or discretion, other divisions being tightly restricted under state and federal regulations.

## *City Physician*

Dr. William R. Helfrich, city physician, made 1,094 calls during the year. Up until recent years the department operated its own clinic at 117 School street twice a week, and the physician would attend these clinics. A few years ago when the Quincy Hospital set up an out-patient department this clinic was abandoned.

## *City Home*

The department continued in 1950 to operate the city home, which was used mainly to accomodate elderly persons who, for various reasons, were unable to make living adjustments outside the home. The institution was filled to approximately 75 percent capacity throughout the year, and served as haven for several evicted families at times. There were 25 persons living at the home on the first of January and 33 on the last of December, with 95 admissions between these two dates.

## *Aid to Dependent Children*

The division of aid to dependent children has become substantially liberalized through legislation during the past few years, with concurrent liberalization of state and federal financial assistance. It now provides benefits for widows and children, as formerly, and also the wives and children of men in jail, of deserters, and for divorcees and illegimate children and their mothers.

During 1950 the cost was \$229,380.58, with \$144,963.00 state and federal receipts and a net cost to the city of \$84,417.58 as against a net cost in 1949 of \$92,938.17.

## *Old Age Assistance*

The Old Age assistance carries the largest case load of any sub-division of the welfare department. On January 1, the case load was 1,386 and on December 31 it was 1,467, or an increase of 81 persons. The total cost for Old Age assistance was \$1,154,302.52, with net receipts from all sources of \$970,691.88, leaving a net cost to the city of \$183,610.73 in 1950 as against a net cost of \$185,043.11 in 1949.

Liberalization by Congress of the Federal Aid Security Act was significant from both a social and financial point of view. The new legislation provided for increased payments to persons already receiving old age and survivors' insurance, and permit others to qualify for benefits. These changes in the federal law permitted the Old Age assistance division to reduce monthly grants to some recipients by the amount of their federal increases. Commissioner Anthony J. Venna expressed the opinion that there should be fewer new applicants for Old Age assistance because of the broadening of the federal program.

### *General Summary*

On January 1, 1950, the Quincy Welfare department had 1,841 active cases in all categories receiving public assistance, and on December 31, 1950, there were 1,920 active cases. Total expenditures for all forms of relief for the year were \$1,617,750.24; total receipts were \$1,182,955.48, leaving a net cost to the city of \$434,794.76. From this figure must be deducted \$21,968.67 which Quincy received as its share of meal taxes, leaving an actual net drain on current revenue of \$412,826.09 for the year. The net cost in 1949 was \$437,505.05. It should also be noted that, percentage-wise, the cost to the city in 1950 was 26 percent of all money spent while the cost to the city in 1949 was 30 percent.

## Quincy Health Department

The year 1950 marked the end of an era for the Quincy health department. Late in the year Quincy's magnificent new health center was completed, and as December drew toward its close the various divisions of the health department were preparing to move from their old quarters into the half a million dollar home.

The health center, first of its kind in this section of the country, was jointly financed by the City of Quincy and the federal government, with Uncle Sam paying one-third of the total cost. M. A. Dyer company, Boston, was the architect, and James S. Kelliher of Quincy was the contractor.

The new health center, which will enable the health department to house practically all of its ramified divisions and functions under one roof, will provide facilities that will allow the City of Quincy to make vitally significant progress in the important field of public health.

The people of Quincy take pride in this functional temple dedicated to preventive medicine.

QUINCY'S NEW HEALTH CENTER

## *Resident Births and Deaths*

With rates per 1,000 population

Year	Births	Rates	Death	Rates	Birth-Death Ratio
1941	1,398	18.3	748	9.8	186.9
1942	1,694	21.9	834	10.9	203.1
1943	1,815	23.6	857	11.2	211.8
1944	1,588	20.4	766	9.0	207.3
1945	1,572	20.1	844	10.8	186.2
1946	2,010	23.9	737	8.7	272.9
1947	2,040	23.8	815	9.6	205.3
1948	1,923	22.1	846	9.7	227.3
1949	1,805	20.8	826	9.5	218.5
1950	1,833	22.0	840	10.1	218.2

## *Live Births for 1950*

In 1950 there were 1,661 births in Quincy. Of these births, 438 were to non-resident parents. Meanwhile, 610 births were recorded to Quincy parents outside the city limits. The total resident births were 1,833, or 22.0 per 1,000 population.

## *Deaths by Months*

(Stillbirths excluded)

Population 83,190, Federal Census 1950

Month	Total In Area	Non-Resident Deaths	Resident Outside Quincy	Total Resident Deaths	Resident Deaths Per 1,000 Pop.
January	72	14	16	74	10.4
February	69	7	22	84	13.1
March	68	9	15	74	10.4

\*\* Maternal death rate per 1,000 total births.

\*\*\* Stillbirth rate per 1,000 total births.

## *Tuberculosis Clinic*

The number of active tuberculosis cases, about the same as last year, ran to a case load of 218. Dr. C. J. Lynch, dispensary physician, noted: one, there was practically no waiting list; two, many more cases were X-rayed; three, the completion of the new county hospital addition, expected shortly, would provide 50 more beds and expedite earlier hospitalization of active cases.

During the year 342 cases were removed from the active file and placed in the closed file by the State. There were 42 new pulmonary cases and two new extra pulmonary cases. Of the new cases, 31 were admitted to the Norfolk County hospital; two died, with various other dispositions of individual cases.

## *Child Welfare Division*

Attendance at all child welfare clinics dropped from 3,040 in 1949 to 2,921 in 1950. Dr. Edmund B. FitzGerald, physician in charge, ascribed the decrease to the growth in physician population in Quincy and to the added fact that many of the younger doctors were asking mothers to bring their children in for examination at regular intervals.

The total clinic registration during the year was 1,584; total active registration on Dec. 31, 1,060; total new registration, 688; total clinics, 334; well baby clinics, 312; pre-school clinics, 10; Orthopedic clinics, 12; number of deaths, 1.

## *Child Guidance Clinic*

During the year 292 cases received service at the Child Guidance clinic, with an average attendance of 30 children each day, the clinic operating two days a week. Although the number of cases receiving service appeared to be slightly under that of the previous year, more new cases were accepted for treatment. Visits to the clinic number 2,947, an increase of 300 over 1949; and more intensive treatment was rendered, as is shown by the fact that the total interviews of 7,180 was an increase of 729 over the preceding year.

Interviews were broken down as follows: by psychiatrists, 1,315; by psychologists, 198; by psychiatric social workers, 3,452; by speech correctionists, 1,225; by remedial tutor, 322; by occupational therapist, 688.

Of the new cases, 37 percent were referred by schools; 21 percent by physicians; 21 percent by friends or relatives who had had previous experience with the clinic; and 14 percent by various agencies.

Ages of children admitted ranged from infancy to 14 years; 25 percent were of pre-school age, and 62 percent were of elementary school age. Seventy percent of the referrals were boys.

The clinic is a state sponsored organization with assistance as a Red Feather Agency of the Quincy Community Chest and Council. Preparations are completed for its removal early next year from the old address at 25 Spear street to the new Quincy medical center.

## *Parochial School Nurses*

Nurses of the Quincy Health department made 219 visits to Parochial schools during the year. The scope of the work of this important phase of public health procedure is shown by the following statistics:

### *Parochial School Nursing Service*

Number of vision tests	1,182
Number of vision retests	79
Pupils seen in school office by nurses	402
Pupils referred to private M. D.	43
Pupils referred to child guidance clinic	2
Pupils weighed and measured	685
Number of health inspections	1,974
Number of home visits	174
Puretone hearing tests	1,268
Puretone hearing retests	150

# Miscellaneous Reports

## SCHOOL DENTAL CLINIC

The school dental clinic examined 4,256 children in 1950; held 189 clinics, not including prophylaxis clinics; treated 324 cases; filled 1,003 permanent and 451 temporary teeth; extracted 181 permanent and 365 temporary teeth and gave 882 oral prophylaxis.

## PRE-SCHOOL DENTAL CLINIC

The pre-school dental clinic held 93 clinics; treated 218 children; filled 579 teeth; extracted 14 teeth; treated 58 teeth; gave 78 oral prophylaxis treatments.

## MILK AND DAIRY FARM INSPECTION

Figures of the inspector of milk and dairy farms show that during 1950 sales in Quincy included: 13,589,139 quarts of pasteurized milk; 761,739 quarts of pasteurized cream; 61,865 quarts of pasteurized Buttermilk; 628,727 quarts of ice cream; and that 616,780 quarts of ice cream were manufactured in the city.

During the year 2,176 samples were analyzed, of which 2,139 were milk samples. There were 3,046 inspections of processing plants, vehicles, dairy and dairy barns, stores and restaurant cabinets.

## REPORT OF VETERINARIAN

There were 263 reported dog bites. All dogs were quarantined as suspicious of rabies, but none developed the disease.

## INSPECTOR OF PLUMBING

The inspector of plumbing received 1,529 applications for plumbing permits and collected \$6,464.00 in fees. He issued 360 permits for new buildings; 1,169 permits for old buildings. During the year 326 buildings were connected with the sewers; 15 with septic tanks and 19 with cesspools.

## REPORT OF FOOD INSPECTOR

The food inspector made 2,450 routine inspections; inspected 261 vehicles and investigated 59 complaints.

He reported as condemned for human consumption 1,483 pounds of meat, 1,534 pounds of fish, 98 bushels of fruit and vegetables and 422 units of bakery and miscellaneous foods.

## V. D. CLINIC

Only five patients were treated by the V. D. clinic during the year, receiving 44 treatments for venereal diseases.

## REPORT OF BACTERIOLOGIST

During the year the work in the laboratory included 3,817 tests. They were as follows: solids weighed, 40; Babcock tests for butter fats, 710; sour serum examinations, 11; phosphatase tests, 720; Coliform counts, 768; plate counts, bacteria, 784; direct microscopic examinations, 784.

# Quincy City Hospital

The Quincy city hospital, approved by the American College of Surgeons and the American Medical Association, experienced a particularly busy year in 1950.

Admissions jumped from 10,131 in 1949 to 10,444 in 1950; daily averages jumped from 203.2 to 211.6; patient days from 74,180 to 77,250; and per cent occupancy from 73.9 to 77.0. The increase in activity during the past year is indicative of the increase during the past decade, during which admissions showed a gain of 3,000 and patient days a gain of 8.134.

"The cost of hospital operation has increased greatly in the last several years," Dr. Ensio K. F. Ronka, MD, the director, pointed out in his annual report to the board of managers. "Wages and commodity prices continue to affect this upward trend. This high cost is also reflected in the relationship which hospital rates have to cost. As actual cost has increased, the hospital rates have not reflected this rising cost. A clear analysis between cost, rates and services, and the results spelled out that all people could understand, would present the community with a picture of the true value of the services which the hospital is offering them."

Although the excess of expenditures over receipts, again more than \$600,000, continued to be a considerable drain on current taxes, some hope was seen in the fact that this excess was \$38,501 less than the 1949 figure.

The following table gives a graphic over-all financial picture of the past three years at the hospital:

## COMPARATIVE EXPENSES AND RECEIPTS

	1948	1949	1950
Salaries and Wages	\$ 807,375.84	\$1,054,326.54	\$1,119,938.35
Expenses	447,232.68	451,314.48	458,581.95
Pensions	3,742.35	4,930.58	5,025.39
New Equipment	19,458.76	25,373.34	14,208.21
Out of state travel	88.72	000.00	000.00
Miscellaneous, deficit bills	5,300.61	000.00	000.00
Improvements	000.00	5,765.00	000.00
Total expenditures	\$1,283,198.96	\$1,541,709.94	\$1,597,753.90
Cash Receipts	865,749.73	894,291.67	988,836.30
Excess of expenditures over receipts	\$ 417,449.23	-\$ 647,418.27	\$ 608,917.60

"The shortage of beds continues as a major problem," Chairman Augustus E. Settimelli, chairman, pointed out in the annual report of the board of managers. "Plans for a 110-bed nursing wing have been completed for several years. Building costs continue to rise. Undoubtedly, any new building program would now cost a great deal more than the original estimate. Nevertheless, the problem demands a solution. We must have more beds."

The chairman pointed out also that the hospital faces the problem of rebuilding or replacing its heating plant within the near future.

Two major undertakings during the year were the Ernst and Ernst survey of, and report on, the administration and operating policies and procedures and the Farish medical audit and report, Mr. Settimelli pointed out in his annual report of the board. Recommendations of the Ernst and Ernst report aimed at increasing economies and efficiency were being effected at the end of the year. As a result of the medical audit by an outside consulting professional expert of national prominence, the staff was reorganized and the staff rules were revised.

During the year an alcoholic clinic, one of the three financed by the state, was established; the hospital snackery was placed on a concession basis, and a microfilm machine was installed to microfilm all medical records of the hospital.

### *Report of the Surgeon-in-Chief*

Dr. J. Edward Knowlton, Surgeon-in-chief, reported 4,937 operative procedures during the year; including 1,496 major private operations, 190 major service operations, approximately 424 gynecological procedures; 1,217 ear, nose and throat operations. 163 eye operations, 123 orthopedic procedures and 356 traumatic procedures. The department averaged more than 14 surgical procedures each of the 365 days in the year.

Dr. Knowlton pointed out that operating room facilities are "entirely inadequate to properly carry on this volume of surgery."

"When we come to the surgical beds available to the citizens of Quincy," he reported, "the picture is sad indeed. If an accident occurred involving serious surgical injury to as few as five individuals, the Quincy City hospital would not be capable of properly taking care of the extra load. Those interested and concerned with the problem of Civil Defense should understand that the Quincy City hospital is currently running at a bed capacity of 110 to 120 per cent where, at no time, should it be over 80 to 90 per cent."

## *Report of Physician-in-Chief*

Dr. Daniel M. Swan, Physician-in-chief, reported that during the year for the first time a full-time residency program was instituted.

"Residents are invaluable in instructing and supervising the house officers, organizing teaching programs and performing many other useful functions in the department," he pointed out.

The division of Cardiology, he reported, for the first time became a unit independent of the laboratory in that it now has its own electrocardiograph technician whose primary task is to see that electrocardiograms are taken as soon as requested.

Another advance instituted during the year, he explained, was the division of Ward M and S I into separate medical and surgical units.

## *Department of Obstetrics and Gynecology*

During the year there were 1,706 deliveries, of which 1,590 were private and 116 were service, Dr. George D. Dalton, department chief announced.

He reported a decrease in the number of stillborns and a decided decrease in the number of neonatal deaths within 48 hours.

Through the generosity of Mr. Howard Johnson, the Quincy City Hospital will soon have its own supply of radium, the department chief announced. The radium will also be available for use in the Milton hospital.

## *Miscellaneous Reports -*

Twenty-three graduates of the School of Nursing were capped on March 7; and 15 were graduated on September 14. Thirty-one students were admitted to the school in the September term. Twenty-three graduates of the 1949 class successfully passed the state board examinations and became registered nurses in February, 1950.

Miss Mary E. O'Gara, director of nurses, reported:

"The Nursing department has been taxed greatly because of continued increasing demands on nurses, and because of the continued over-crowded conditions on the wards. The turn-over of nursing personnel continues to be a problem beyond our control—the world situation, marriage, family responsibilities of married women, desire for change in the fields of nursing, and illness are among the chief causes. The current economic situation is an additional cause for the turn-over—we cannot compete with industry."

Since the opening of the Out-Patient department in 1949 there has been a slow but steady increase in the number of patients treated. In 1950 there were 3,219 patient visits, an increase of 13 per cent over 1949. The average amount collected was forty-four cents per patient visit, while a rough estimate of the cost is above \$4.50, indicating a cost of \$14,000 to \$15,000 to operate the department.

The report of the laboratories and blood bank showed 84,924 tests in clinical pathology; 6,609 tests in anatomical pathology and 14,220 in experimental pathology for a grand total of 105,753. Comparative figures for the volume of routine laboratory work for four years show the following number of laboratory tests: 1947, 51,837; 1948, 73,293; 1949, 83,336; and 1950, 91,533.

The School for Medical Technologists, approved first in February, 1949, was reapproved in 1950; and the first student was graduated in October, 1950.

The department showed a profit in 1950 of \$56,721.36 as against \$42,818.66 in the preceding year.

During 1950 the dietary department served 407,771 meals to staff, employees and patients at a cost of \$155,000. This brings the raw food cost to 38 $\frac{3}{4}$  cents a meal.

A grand total of 6,903 anesthetics were given during the year. They are as follows: operating room, 4,153; delivery room, 1,636, accident room, 506; out-patient department, 381; dental, 177. Oxygen equipment was used 545 times.

A total of 7,830 physical therapy treatments were given.

Hospital ambulances made more than 2,500 house calls without being involved in any reportable accidents.

The hospital library registered a circulation of 16,138, a gain of 602 over the preceding year.

## Quincy Public Schools

Quincy public schools operated in 1950 for the first time under the Plan E charter, effecting the council-manager form of municipal government.

The school committee, now elected by the proportional representation method of voting, included Mayor Thomas S. Burgin, Vice Chairman A. Wendell Clark, William A. Anderson, Dominic J. Chiminello, Mrs. Annie B. Forsyth, Dennis F. Ryan and Miss Ethel B. Wiley.

Alexander Smith had been reelected to the committee, but he resigned at the beginning of the year to accept the position of city auditor; and Miss Wiley was elected on the recount of his votes.

The year was significant because it marked the beginning of a comprehensive school construction program which, it was estimated, will cost around four million dollars. With legislative approval to borrow two million dollars outside the debt limit, the city actually started the program by beginning three major projects.

Five new class rooms were added to the Wollaston school cutting up the old auditorium on the second floor, and construction was started on a new combination auditorium and gymnasium.

Sites were chosen and architects selected for two new elementary schools, one of 10 class rooms on Fenno street and one of 18 class rooms on Palmer street. The first will relieve the pressure on the Massachusetts Fields school and will also serve the recently developed Beechwood Knoll section. The second will relieve crowded conditions at the Nathaniel M. Hunting school and will also serve the Snug Harbor veterans' housing project into which 400 families have moved. Plans for both buildings were under way as the year ended.

Other major proposals under consideration on the long range building program included a large addition to the Quincy Trade school, a new elementary school about midway between the Wollaston and Cranch schools, and new additions to the Montclair and Atherton Hough schools. Meanwhile the year opened with the use of six additional class rooms, four of which were in the recently completed addition to the Atherton Hough school and two were made by alterations at the Squantum school.

Public education in Quincy is big business, involving the operation of a physical plant valued at more than \$6,750,000 at a cost of approximately \$2,500,000 a year, employing some 650 persons, including 550 teachers, and providing instruction for about 12,000 pupils. Two senior high schools, four junior high schools, a trade school and 19 elementary schools constitute the main elements of the system.

During 1950 some of the major expenditures were as follows: instruction, \$1,766,514; maintenance, \$138,969; plant op-

eration, \$258,037; additional equipment, \$37,386; coordinate and auxiliary agencies, \$53,993; general control, \$55,234, and Trade school, \$83,289.

Quincy has the so-called 6-3-3 system: the first six grades are in the elementary school; grades seven through nine in the junior high school, and the last three grades in senior high school.

Work in the first six grades is generally basic. In the elementary school the accent is on such fundamentals as the traditional three R's and the general development of the pupil as a healthy, happy responsible member of society.

At the junior high school level the school offerings to the pupil begin to broaden with the introduction of shop, home economics, chorus, orchestra and club activities. Elective subjects begin to appear in the ninth grade,

When the pupil moves on into senior high school he or she finds a wide variety of elective subjects. During these last three years of public school education given boys and girls by the City of Quincy, they may shape their courses along college preparatory lines, or they may prepare themselves to step forthwith into the world of business or industry. Trade school graduates are usually able to find well-paying jobs shortly after graduation.

The Quincy school system endeavors, in so far as possible, to shape the curriculum to fit the needs of the pupil, particularly at the secondary level. The combination of a comprehensive counseling program and a wide range of electives enables Quincy schools to achieve distinct success in this field.

Considerable attention is directed to the specific needs of pupils with individual problems. Special classes are provided for the physically handicapped, for those who have sub-normal vision or hearing and for those who, for various reasons, find book learning difficult. Enrollments in these classes are kept low so that the teacher may have more time to devote to each pupil.

During 1950 the Quincy school system further advanced its usefulness to pupils in several fields. A course of automobile driver education was added to the curriculum. All fifth graders were given sodium fluoride treatment for their teeth. Provision was made for the aptitude testing of the entire tenth grade. Plans were adopted for a sight conservation class for pupils at the junior high school level. A revolving athletic fund was set up, allowing for future expansion of the athletic program.

The instructional personnel of the regular schools includes 133 senior high school teachers, 79 junior high school teachers, 239 elementary teachers, 18 principals, 6 directors and 18 special teachers. There are 16 teachers in the Trade school, seven instructors in the adult civic education department, and 59 in various phases of evening school work. There are 13 employes listed under the heading of general control, 10 clerks, 9 connected with coordinate and auxiliary agencies and 66 in the custodial and maintenance staffs.

**ATTENDANCE — REGULAR DAY SCHOOLS**  
For the Year Ending June 23, 1950

\* All public schools are state-aided to the extent that the city receives reimbursement from the state. The term "State-Aided" as contrasted with "Regular" applies to special types of education for which the state and, in some instances, the federal government make special appropriations.

## Thomas Crane Public Library

The year 1950 marked the twenty-fifth anniversary of Galen W. Hill as librarian of the Thomas Crane Public Library. In his annual report to the trustees, the 80th in the series, Mr. Hill reviewed some of the accomplishments of the library during the past quarter of a century.

When he took the position of librarian in February, 1926, Mr. Hill found the system consisting of the Crane Memorial Library, seven branches, a hospital library just starting, an extensive service of class room libraries in the elementary schools and a high per capita circulation of books. During the next three years three more branch libraries were established.

This expansion was external, however, and it was apparent that unless the system deteriorate immediate plans must be made for internal expansion: first, in the acquisition of more books to meet the increasing need, and, second, in the development of special services.

"As the first goal, 'enough books to meet the demands', I am afraid that can never be attained," Mr. Hill points out in his report this year. "However, in my first six years we were able to secure increased book appropriations that gave a good start toward meeting our needs. This was fortunate for the depression, which began in 1930, was the period when the demand was greatest and our circulation boomed to an all time high, 901,823 books borrowed in 1933.

"In twenty-five years the book collection has gone from 62,494 on January 1, 1926, to 149,106 on December 31, 1950 while at least 90,000 books have been discarded as worn out, obsolescent or lost, for without regular weeding a library cannot hope to have an active collection."

The second goal, the improvement of existing library services and the development of new services, Mr. Hill pointed out, included: appointment of a reference librarian in 1930 and the development of this department on a full time schedule; segregation of books on art and technical subjects in one room and the development of this department in 1932; the beginning of the music collection in the same year; development of a readers' advisory service: mounting and cataloging of more than 10,000 pictures as a W.P.A. project.

The major accomplishment of the past quarter of a century, he pointed out, was the construction of the library addition in 1939. The new building housed the reference room, art and technical books, the expanded music department, offices, a staff room, a lecture and exhibit room and the boys and girls department, which, since 1932, had been provided quarters by the purchase of a private residence on Spear street.

COMPLETES QUARTER CENTURY OF SERVICE

GALEN W. HILL

Librarian, Thomas Crane Public Library

"One project which I hoped to be realized, I am afraid must be postponed to less chaotic times," Mr. Hill reports this year. "This is the erection of a branch library building in the northern section of the city within easy distance of North Quincy High school, a branch that might consolidate perhaps two of our present branches and would also be large enough to contain a reference library and a collection of books sufficient to provide high school students, college students and serious readers of that section with a library service commensurate with that of the main building at Quincy Square. Such a building and such services are badly needed."

During the past 25 years the personnel has grown from 13 to 35 assistants. Of the original board of trustees who appointed Mr. Hill in 1926, only one, Miss Georgiana C. Lane, has remained in continuous services. Her record in 1950 is 28 years as a trustee.

### *Record for 1950*

The total circulation of books for the year of 1950 was 546,812, to which can be added 27,236 phonograph records and 14,998 mounted pictures. The total circulation figure is 589,046, practically seven per capita. Borrowers registered at the end of the year were: adults, 13,212; juvenile, 8,890; total, 22,102; or about 25 percent of the population.

The home use of books and magazines was, at the end of May, 10,000 above the figure for the same period in 1949; but the outbreak of hostilities in Korea marked a shift into reverse so that by the end of the year the annual figure showed a gain of only 1,365 over the preceding year.

"Other libraries report almost identical experiences with their home loans," Mr. Hill pointed out, "The causes being generally attributed to a rapid shift to a war-time economy; with the phenomenal increase in home television installments an important factor."

The year 1950 was marked by: one, the increasing proportion of non-fiction borrowed; two, a gain of 40 per cent in the loans of the 'teen age library; three, the increasing use of the music room and the marked gain in the loan of records; four, the addition and cataloging of 9,550 books as against the withdrawal of 4,307; and, five, the installation of fluorescent lighting in the main reading room of the older building.

## *Dept. of Veterans Service*

A grand total of 14,728 persons sought either advice or assistance from the department of Veterans' Services during 1950.

Edmund F. Genereau, director of the department, estimated that more than 60,000 Quincy citizens are entitled to seek advice or assistance from his bureau. Of this grand total about 20,00 are veterans, and the others have veteran-connected status through kinship with veterans.

During the year the department successfully processed 614 pension and compensation claims for veterans and their dependents.

"The invasion of South Korea by the communists has produced a violent change in the civilian business and industrial life of our city," the director pointed out in his annual report, "Many hundreds of our citizens have been called back from a reserve status to active duty with the armed forces. Other hundreds have been drafted into the service for the first time.

"The resultant loss of estimated income into thousands of homes in Quincy has made it necessary for many families to apply for assistance from this department—a condition which has no foreseeable change for many months to come."

## *Public Works Department*

The public works department of Quincy comes in closer contact, perhaps, with the daily lives of citizens than does any other municipal department. It constructs and maintains their streets, collects their garbage and trash, protects their trees, fights their mosquitos and builds and maintains their public buildings through its various divisions. Through its two largest divisions it furnishes water and sewerage facilities.

Since the public works department comes in such close contact with the day to day life of each Quincy resident, a breakdown, even though temporary, in any one of its several divisions instantly affects their well being. A break in a water main may leave thousands of homes without water for many hours, perhaps an entire day. A defective storm drain may flood a dozen cellars and cause heavy property damage. For these reasons the public works department, by virtue of its functions, is the most vulnerable of all municipal agencies to public criticism. Frequently the breakdown in service results from conditions over which the department has no control.

## *Highway Division*

The highway division carried on its usual work of cleaning streets, repairing streets and sidewalks, repairing equipment and maintenance of drains. In addition to the routine work, the Saville street overpass was largely replanked and temporary repairs were made at the Bates Avenue bridge, which has been considered unsafe for heavy vehicles and will have to be rebuilt shortly.

This division, through its sign department, erected, replaced and maintained street signs; painted traffic lines and set out stands for Christmas decorations. Mechanics checked and repaired parking meters.

## *Municipal Buildings*

During the year public works department employees painted the upper and lower corridors of the council chambers, several offices in the city hall and the exterior trim of the building. The exterior of all fire stations were repainted, and repairs were made to both Central fire station and the police station.

During the year the four-room addition to the Atherton Hough School was completed by Clark and Smith, Inc., from designs by Albert West, Quincy architect. A contract was let to A. Piotti company for additions and alterations to the Wollaston school from plans by Carrol and Paul Coletti, Quincy architects. The Old Colony Crushed Stone company was awarded the contract for filling the site of the Fenno street school. Coletti brothers are also the architects on this project.

## *Sanitary Division*

Rubbish and garbage collections in 1950 were approximately on the same schedule as during the past few years. However late in the year contracts were let for the purchase of almost an entire new fleet of rubbish and garbage trucks, promising increased efficiency and reduced operational costs after it has been delivered and placed in operation.

## *Forestry and Gypsy Moth*

Removal and destruction of trees affected by the deadly Dutch Elm disease took up much of the time of this department during the year. The routine spraying to destroy gypsy moths and brown-tails, as required by law, was carried on; as was the annual program for beautifying the city through the maintenance of flower beds. Some mosquito spraying was done by the department, but the bulk of this work was carried on by contract.

## *Engineering Department*

The engineering department, a subsidiary of the public works department, is at the beck and call of all divisions of the municipal government needing engineering services. Annually it receives almost countless requests for estimates, surveys and recommendations in connection with the many projects under consideration by the executive and legislative branches, such as street acceptances and widenings; street, sewer and storm drain construction, land takings and the like.

The engineers prepare plans for all land takings and street acceptances; they prepare descriptions of land to be sold for taxes; they establish grades for new construction, and they do the engineering work incident to the construction of public buildings, streets, sewers, storm drains. One of their many tasks is that of keeping up to date the assessors' tracings, showing transfers of ownership and new construction.

### *Street Acceptances*

During 1950 the city council accepted 5,563.77 feet of new streets, or 1.053 miles. The acceptances included portion of 12 streets, as follows:

Barham avenue, from accepted part southerly to Wilson avenue, 564.76 feet.

Copley street, Randlett street to Rice road, 475.21 feet.

Dickens street, Rice road southerly, 393.84 feet.

Ocean street, Squantum, easterly, 133.13 feet.

Sampo place, Albertina street northwesterly, 247.50 feet.

Sheldon street, Milton line southerly, 359.72 feet.

Shennen street, Ratchford street to Sea street, 377.11 feet.

Small street, West Squantum street to Holbrook road, 386.88 feet.

State street, Riverside avenue to Delano avenue, 180 feet.

Thomas street, Sea street to Weymouth Fore River, 318.88 feet.

Trevore street, Dorchester street to Bellevue road, 815.78 feet.

Woodcliff road, Ames street southerly and easterly, 1,310.96 feet.

### *Accepted Streets Constructed*

During the year the city constructed 6,443 linear feet, or 1.22 miles of accepted streets as follows:

- Babcock street, Sea to Manet avenue, 500 feet.
- Calvin road, Moffat road easterly and southerly, 678 feet.
- Copley street, Randlett street to Rice road, 500 feet.
- Deerfield street, accepted part easterly, 375 feet.
- Dickens street, Roberta Lane to Rice road, 394 feet.
- Ford street, Moffat road to Homer road, 200 feet.
- Gothland street, Dedroff street to end, 320 feet.
- Huckins avenue, Bellevue road to Bayside road, 606 feet.
- Kidder street, Garfield street to Granite street, 260 feet.
- Monmouth street, Bellevue road to Bayside road, 750 feet.
- Ocean street, Carrigg road to end, 160 feet.
- Oliver street, Hunt street to dead end, 200 feet.
- Shennen street, Ratchford street to Sea street, 380 feet.
- Thomas street, Sea street to end, 327 feet.
- Wallace road, Adams street to Sunnyside road, 793 feet.

### *Streets Resurfaced*

In 1950, 14,220 feet, or 2.69 miles of streets were resurfaced. They are as follows:

- Albertina street, Center street westerly, 800 feet.
- Arnold street, Washington street to Murdock avenue, 360 feet.
- Canal street, at Brackett street, 100 feet.
- Fifth avenue, Southern Artery to Edinboro road, 800 feet.
- Gannett road, East of Sea street, 80 feet.
- Grindley street, Shawmut street to Argonne street, 1050 feet.
- Hancock street, Elm avenue to Saville street, 6000 feet.
- Liberty street, Plain street to Center street, 400 feet.
- Lurton street, High street to Pembroke street, 550 feet.
- Mears avenue, Sea avenue to Sea avenue, 1,240 feet.
- Newport avenue, Holbrook road to Wilson avenue, 850 feet.
- Packard's Lane, Granite street northerly, 600 feet.
- Suomi road, Buckley street to Smith street, 900 feet.
- Turner street, Edgewater drive southerly, 190 feet.
- Vernon street, Center street, southerly 300 feet.

## *Streets Rebuilt*

The city rebuilt 1,420 feet of street in 1950. Rebuilt streets including the following: Abbey road, Washington street to Graham street, 280 feet: Conrad street, Franklin street to Town line, 240 feet: and Sea street, No. 749 easterly to Babcock street, 900 feet.

## *Parking Area Taking*

Looking into the immediate future in which parking space in the retail district appears to be a necessity for the continued protection and prosperity of Quincy's retail industry, the city council on December 19, 1950, took for parking purposes what became known as the East-of-Hancock-street parking area. It contains sufficient land to accomodate about 282 automobiles. The land taken lies between Hancock street, Revere road, Cottage avenue and Cottage street. Excluded from the taking was the business property facing the main business streets and several residences on Cottage street.

The engineering department, of course, was called upon to do much of the preliminary detail work in preparing the order and the accompanying plan for the taking by the council, and for the required public hearings.

## *Miscellaneous Engineering*

During 1950 the engineering department did the necessary engineering work for constructing 26,011 linear feet of amiesite sidewalks and 582 feet of granolithic sidewalks; replacing 799 feet of Granolithic sidewalk; rebuilding 1,134 feet of amiesite sidewalk, and installing 15,289 feet of granite curbing, and 3,775 feet of concrete curbing.

Some 1,936 feet of granite curbing was reset.

The engineering department also prepared plans for sewer and drain construction, in addition to plans for street and corner widenings.

## Quincy Water Department

Quincy, with an estimated population of 85,309, used on an average 7,045,400 gallons of water in 1950, or 82 gallons per capita, daily.

During the year 18,333 feet of main pipe was laid, bringing the total number of miles in use up to 210.9. In 1950, 22,814 feet of new service pipe was laid, bringing the total up to 846,163 feet. With 404 taps made during the year and two services discontinued, the total number of services in use came to 18,296. In 1950 repairs were made for 29 leaks in the mains and 421 leaks in service pipes.

Of the total amount of water used, 99.4 percent is metered through 18,180 meters, of which 430 were installed during the year. At the end of the year 2,028 fire hydrants were in use.

### *Daily Consumption in Gals. 1950*

January	6,422,500	May	6,568,000	September	7,112,500
February	6,389,400	June	7,468,800	October	7,253,500
March	6,772,400	July	7,692,200	November	7,418,200
April	6,568,900	August	7,640,900	December	7,186,700

The City of Quincy purchases its water from the Metropolitan District commission and sells it retail to citizens. The excess of receipts over costs enables the city to maintain a substantial water reserve. Citizens have benefited from time to time when this surplus has been tapped to lower water rates or for other municipal purposes.

However, the city found itself in 1950 facing the necessity in the near future of spending a large sum for rehabilitation of its water works system. This sum, it was apparent, would far exceed the funds expected to be available in the water reserve, and would necessitate a bond issue.

The Quincy water works system, fed by gravity, provides inadequate pressure in some parts of the city during long periods of dry weather when demands are high. In an effort to equalize pressure a series of reservoirs, standpipes and tanks were constructed during the first third of this century. These storage facilities have not been able in recent years to maintain the desired pressure throughout the distribution system during seasonal dry spells. The huge new Blue Hills reservoir, now under construction by the Metropolitan District commission, is expected to equalize pressure to a more satisfactory degree in Quincy mains during these periods.

## *Storage Facilities*

Name	Year Built	Elevation	Gallons
Forbes Hill Reservoir	1901	192	5,100,000
Forbes Hill Standpipe	1900	251	330,000
Cranch Hill Standpipe	1936	233.5	2,000,000
Penns Hill Standpipe	1926	233.5	1,000,000
Penns Hill Tank	1934	256	200,000
Houghs Neck Tank	1914	205	400,000
Squantum Tank	1926	211	300,000
Break Neck Hill Standpipe	1934	269	197,000

During 1950 Quincy laid 952 feet of 4-inch pipe; 6,980 feet of 6-inch pipe; 7,886 feet of 8-inch pipe; 1,360 feet of 10-inch pipe and 1,155 feet of 12-inch pipe. Some 1,800 feet of old 6-inch and 8-inch pipe was abandoned.

In use at the end of the year was: 16,571 feet of 2-inch; 64,634 feet of 4-inch; 490,097 feet of 6-inch; 286,973 feet of 8-inch; 109,281 feet of 10-inch; 94,915 feet of 12-inch; 35,648 feet of 16-inch, and 15,542 feet of 20-inch pipe.

## *Sewer Department*

The Quincy sewer department carried on an active program of construction during 1950 when 15,423 feet of particular sewers, 15,494 feet of common sewers and 4,508 feet of surface drains were laid.

This construction gave Quincy a grand total of 16,813 sanitary sewers in operation; brought the total amount of common sewers up to 176,529 miles and the amount of storm sewers up to 121.35 miles.

Particular sewers, which connect buildings with the main sewer line, were built by wards as follows: Ward One, 106; Ward Two, 23; Ward Three, 20; Ward Four, 77; Ward Five, 53; and Ward Six, 66: These 345 particular sewers averaged 44.705 feet in length and \$79.275 in cost. Total cost of particular sewer construction came to \$27,349.87.

The 15,494 feet of common sewer line laid during the year includes 9,190 feet in Snug Harbor, the veterans' development, and 6,304 feet in other parts of the city. Installation of 90 connections for particular sewers was also authorized by the Quincy Housing Authority for Snug Harbor.

Of the total amount of common sewer laid in the city, outside of Snug Harbor, there was 5,631 feet of 8-inch pipe, 353 feet of 10-inch pipe and 320 feet of 12-inch pipe. The Snug Harbor project included 5,657 feet of 8-inch pipe, 1,299 feet of 10-inch pipe and 2,234 feet of 12-inch pipe.

During the year 57 manholes were constructed in Snug Harbor and 36 elsewhere in the city; bringing the total number of manholes in Quincy up to 4,458.

Of the total amount of 4,508 feet of storm pipe laid during the year, there was 2,617 feet of 10-inch pipe, 1,503 feet of 12-inch pipe, and 242 feet of 24-inch pipe, with small lengths of various other sizes. Four new drain connections were constructed during 1950.

### *Recreation Commission*

Organized recreational activities of Quincy's young, 6 to 16 years, conducted under the supervision of the Quincy Recreation commission made general gains in 1950 over the preceding year. Without a single exception attendance figures in all activities topped those of 1949.

Supervision was furnished by 110 part-time paid recreation leaders, 11 more than were employed in 1949, working under the over-all direction of the commission. In the absence of a full-time professional director, a post which the city has not seen fit to fill, William Bowyer, Quincy school recreation teacher for several years, again served as part-time supervisor of recreation.

During the year the commission furnished leadership for 33 different playgrounds, with an average daily attendance of 2,513 as against 2,225 for 1949. These attendance figures are gathered by actual count morning and afternoon. The accumulated count for the season was 189,915 as against 127,238 for the preceding year.

One recreation building and 17 recreation centers were in operation at times during the year. The total attendance at the recreation centers, opened 27 weeks, was 39,505 as against 36,462 in 1949. Popularity of various sports and pastimes is indicated by the following figures of attendance: girls' softball, 2,542; senior baseball, 3,480; little baseball, 3,444; basketball, 10,329; tennis, 940; track and field, 3,152; arts and crafts, 22,156; organized activities, 117,760; music, 3,690; dramatics, 6,780; dancing, 5,863; club groups, 6,135; bathing beaches, 10,277. The accumulated activity participation was 196,568.

During the year the commission spent \$46,737.15. This is a cost of only 23 cents per individual for recreation on the basis of current expenses, or a cost of 34 cents if capital outlay is included.

## *Board of Park Commissioners*

The board of park commissioners, which has charge of maintenance of all parks and playgrounds owned by the city, works in close harmony with the recreation commission to provide physical facilities for out door municipal recreational activities. In 1950 the park commissioners made every effort to use all areas and facilities wisely and to the best advantage of citizens while keeping within the budgetary appropriations.

Again the park board had to contend with vandalism another year. J. Ernest Collins, chairman, pointed out that the wanton damage or destruction of park property simply means repairs and replacements which in turn means that money which could well be used for other purposes has to be spent unnecessarily.

Keen interest evinced in softball during the year revealed that the 12 diamonds available for this fine sport were insufficient to meet the demands. Facilities for regulation baseball were also used to the limit during the playing season. Under the direction of Foreman Harry T. Boyd all playing fields were maintained in excellent condition. In fact, football players and managers reported frequently that the gridiron at the Municipal Stadium was the best playing field they had seen in the state.

Six municipal beaches, Avalon, Mound Street, Bakers, Perry, Heron Road and Rock Island Cove, were maintained during the swimming season by the board. Maintenance was also provided for 24 tennis courts. Most popular were those at Faxon Field, Squantum and Fenno street.

Many tennis courts built under W.P.A. more than a decade ago are sinking and beginning to crack, and must be rebuilt in a short time, the commissioners pointed out in their annual report to the city manager.

The commissioners also maintained the bowling green at Merrymount park, and skating rinks at Stoney Brae, Sailors Home, Manet Lake, the Meadows and at Squantum.

With the funds at its disposal the commission was able to effect a number of improvements during 1950. These included: basketball backboards and nets at both the Washington school and Perkins field; fill at Heron road to start a new play area; relocation of softball diamonds at Fore River and LaBrecque playgrounds; repainting garage and workshop at Upper Merrymount park; repainting concessions building and pavilion at Pag-eant Field; and various improvements at Faxon Park.

## *Department of Civil Defense*

The outbreak of hostilities in Korea was followed on July 20, 1950, by the passage of legislation in Massachusetts establishing the Civil Defense Agency, requiring that each community set up a civil defense organization.

Pursuant to the Act, the city manager appointed Judge James A. Mulhall as director of civil defense in Quincy. The director immediately appointed an advisory council of three members to act as a policy making body. This council consisted of Gerald Hurley, G. Prescott Low and Mrs. George W. Nightingale.

On August 20, Judge Mulhall named Thomas F. Macdonald as assistant director. Thereafter the new city department was organized along the lines of the so-called Cambridge Plan, which was adopted by most cities in the Commonwealth.

The auxiliary police was the first unit activated under the new city department, and Captain William Ferrazzi was named as liaison officer. Subsequently Deputy Chief James Daley was named to assist in the training of the auxiliary fire force; and other groups were organized. Edgar G. Lehmann was named deputy director in charge of police services, and J. Brooks Keyes was named deputy director in charge of fire services.

During November other division heads were appointed as follows: H. Kenneth Hudson, communications; Dr. Richard M. Ash, medical aid and health; Dr. Rowland S. Bevans, atomic warfare, with James A. Pennypacker as administrative assistant; Charles R. Herbert, public utilities; Anthony J. Venna, evacuation, housing, feeding, civilian war aid; George F. O'Brien, legal division; Miss Virginia Curtin, administrative division; Ernest W. Ricker, records and supply.

On December 20, the state civil defense agency divided the Commonwealth in nine regions; and Quincy was placed in Region Five, the director of which was Mayor John B. Hynes of Boston.

On the same date the Quincy city manager detached three city officials from their regular duties and assigned them to a civil defense advisory council under the direction of Arthur I. Burgess, city solicitor. They were Deputy Chief Robert Fenby of the fire department; Captain William Ferrazzi of the police department, and James P. Donovan, superintendent of the water department.

By the end of the year the various division heads were beginning to recruit volunteers for their respective organizations. As yet there was no federal civil defense agency, and the Quincy department was organizing under general instructions from the state department.

## *City License Commission*

The board of license commissioners is composed of the fire chief, police chief, city clerk, commissioner of health and the building inspector.

It has supervision, under the state law, of issuing licenses of various types. It may, after due legal procedure, suspend or revoke licenses for violations of various sorts.

Money collected for licenses issued by the board go into the general city funds. During 1950 these licenses brought \$80,550.50 into the city treasurer.

### *Income from Licenses in 1950*

Type of License	Amount Collected
Common victualler	\$ 900.00
Lord's Day	730.00
Garages, gas, repair shops, alcohol, inflammables	3,357.50
Motors and parking spaces	1,915.00
Amusements, public halls	440.00
Secondhand and junk shops	350.00
Bowling, billards, pool	1,820.00
Liquor	70,300.00
Miscellaneous	748.00
	<hr/>
	\$80,560.50
Less refund	10.00
	<hr/>
Total net	\$80,550.50

## *Retirement Board*

The Quincy Retirement board supervises the retirement and pensioning of municipal employees who are members of the two contributory retirement systems operating for their benefit.

The so-called Quincy retirement system, in which the employees contribute four percent of their pay, was established in 1935, and is the smaller of the two. The so-called State-Quincy retirement system, which was installed in 1946, calls for a five percent contribution from employees. In each system the city matches the amount contributed by members.

The membership in the Quincy Retirement system dropped during the year from 186 to 173 through resignations or transfers of active employees; while membership of pensioners remained at 24 with one death and one retirement. The number of dependent beneficiaries of deceased members remained at two.

The balance sheet of this system at the end of the year recorded: investments, \$181,490.89; accrued interest, \$1,732.90, and cash, \$1,035.37, for a total of \$184,259.16.

The much larger State-Quincy retirement system began the year with 1,022 active members; enrolled 176 during the year and lost 143 by death, withdrawal, retirement or transfer. The inactive membership rose from 53 to 69 during the year. The total active and inactive membership at the close of 1950 was 1,124.

As the year closed this system had total assets of \$841,912.84. These assets included: investments, \$783,985.10; Savings Bank deposit, \$35,000; cash, \$17,433.11; accrued interest, \$5,494.63.

## *Department of Building Inspection*

The estimated cost of construction for which permits were issued by the Quincy department of building inspection during 1950 was \$3,952,753.

Construction by wards was as follows: Ward 1, \$749,574; Ward 2, \$391,125; Ward 3, \$280,921; Ward 4, \$708,470; Ward 5, \$990,092; Ward 6, \$832,571.

The following table gives a detailed picture of building operations in Quincy for which permits were issued during the year:

Permits	Type	Estimated Cost
290	One family dwellings	\$2,057,700
6	Two family dwellings	44,850
2	Four family dwellings	33,000
15	Mercantile	212,700
1	Manufacturing	123,000
9	Storage	11,750
242	Garages	153,475
846	Residential alterations	503,141
141	Other alterations	583,536
32	Removals	8,660
2	Elevators	5,300
22	Signs	11,441
14	Miscellaneous	204,200
Total		<hr/> \$3,952,753

During the year the building department collected \$10,700 in fees.

Building permits issued in 1950 provided for 310 additional living units from new construction and 48 units from alterations to existing structures.

The Board of Appeal for building rendered decisions on 13 applications. Of these nine were granted, four were denied and one was pending at the end of the year.

The Board of Appeals for Zoning rendered decisions on 20 applications, of which 15 were granted and five denied.

## Sealer of Weights and Measures

Quincy maintains a department of weights and measures in an effort to guarantee fair play in business. The sealer, of course, has no say as to the quality of goods sold or the price paid, but he is the umpire in questions as to whether or not the buyer gets the amount of goods paid for.

It is the function of the sealer to protect both vendor and buyer by maintaining the accuracy of the measuring devices. In rare instances inaccuracy in the measurement of goods conveyed is the result of fraudulent intent. Very frequently short or long measurement results from a mechanical defect in the measuring device unknown to either party. Usually such inaccuracies develop in scales as a result of their complicated mechanical construction; the yard stick and the gallon container, however, are less inclined to get out of order.

Frequent checking of measuring devices by the sealer of weights and measures protects both the buying public and the vendors from unfair measurement, intended or otherwise.

During the year the department made 3,354 reweighings, of which 2,444 were found correct, 608 underweight and 302 overweight.

Commodities	Tested	Correct	Under	Over
Bread	853	652	137	64
Butter	157	109	48	0
Coal, in bags	25	22	3	0
Coal, in transit	19	2	2	15
Confectionery	101	89	0	12
Dry Commodities	34	34	0	0
Flour	45	31	14	0
Fruit, vegetables	592	431	115	46
Lard	22	22	0	0
Liquid commodities	55	47	0	8
Meats, provisions	1155	879	229	47
Potatoes	296	126	60	110
Totals	3354	2444	608	302

### *Sealer of Weights and Measures (cont.)*

During the year the department collected fees of \$3,416.20; including \$2,698.30 in sealing fees, \$32.90 in adjusting charges and \$685 from peddlers and hawkers.

A total of 1,339 scales were sealed, 64 adjusted and 116 condemned. Some 2,661 weights were sealed, 39 adjusted and only 3 condemned. A total of 405 capacity measures were sealed and 48 condemned. Following tests, 778 automatic measuring devices were sealed, 32 adjusted and 49 condemned. In testing linear measures, 169 yardsticks were approved and 23 were condemned.

Out of a total of 6,230 checks made, only 239 measuring or weighing devices were condemned while 5,352 were sealed, or approved, and 135 adjusted.

During the year the department made 13,881 inspections. Only two court actions were brought, one resulting in an acquittal and the other in a \$50 fine.

### *Department of Wire Inspection*

The division of wire inspection consisting of only an inspector and a clerk, is one of the smallest municipal departments with respect to personnel, but its efficient operation is of vital importance to the inhabitants of Quincy. Electricity, like fire, is a useful servant, but it must be kept under rigid control, or it may become a menace to life and property. It is the duty to this department to keep electricity properly channeled.

During 1950 the department issued permits for the wiring of 301 new dwellings, including 199 one-family houses, one two-family house and 101 four-family houses. Permits were also issued for wiring 10 garages, two mercantile buildings and 16 miscellaneous other new structures.

Permits issued for additional wiring of old buildings were as follows: 854 one-family houses, 588 two-family houses, 13 three-family houses, 48 four-family houses, 252 mercantile buildings, 12 manufacturing buildings, 43 garages and 148 miscellaneous structures.

The issuance of a total of 2,574 permits brought in fees of \$5,833.37.

New wiring was installed in 79 dwellings and 34 other structures. Permanent wiring for appliances included 1,302 oil burners, 268 electric ranges, 4 refrigerators, 49 hot water heaters, 10 stokers and 11 gas burners.

## State Election

November 7, 1950

Quincy registered vote—45,186      Quincy total vote cast—34,606

### QUINCY VOTE FOR REPRESENTATIVE

13th Congressional District

* Richard B. Wigglesworth, Republican	21,402
David J. Concannon, Democrat	11,971
William R. Ferry, Prohibition	187

### QUINCY VOTE FOR GOVERNOR

* Paul A. Dever, Democrat	16,895
Arthur W. Coolidge, Republican	16,977
Mark R. Shaw, Prohibition	80
* Elected	

The Democratic party elected all of its candidates on the state ticket. Elected were: Charles F. Jeff Sullivan, lieutenant governor; Edward J. Cronin, secretary; John E. Hurley, treasurer; Thomas J. Buckley, auditor; and Francis E. Kelly, attorney general.

Clayton L. Havey, Republican, was elected to the executive council from the Second District, which includes Quincy.

Charles W. Hedges, Republican, was elected state senator from the First Norfolk district, which includes Quincy.

Clifton H. Baker, Alfred B. Keith and Carter Lee, all Republicans, were elected representatives from the First Norfolk District, which includes Wards 3, 4, 5 and 6 of Quincy.

William W. Jenness, Republican, was elected to represent the Second Norfolk district, which includes Ward 1 of Quincy.

John L. Gallant, Raymond P. Palmer and Albert E. Roberts, all Republicans, were elected representatives from the Third Norfolk District, which includes Ward 2 of Quincy and the towns of Weymouth and Braintree.

## Data on Quincy Dogs

The City of Quincy employs a dog officer and maintains a pound to enforce the various laws and ordinances pertaining to canines. In addition to his enforcement duties with respect to owners, the officer befriends stray and homeless dogs, both in an official and in an unofficial capacity.

During 1950, D. Francis Sweeney, the Quincy dog officer, picked up 257 dogs. Of these only 185 were disposed of by killing. Homes were found by Mr. Sweeney for 44 dogs, and 26 lost dogs were returned to their owners.

He found it necessary to bring only four owners into court for violations. Two were fined five dollars each; and the cases of two were placed on file.

## *Quincy Housing Authority*

The Quincy Housing Authority, created by the city under state laws, is a separate legal entity which has supervision over all public housing. It consists of five unpaid members, one appointed by the state and the others appointed by the mayor, or, now by the city manager.

Its members are Louis A. George, chairman; J. Girard White, vice chairman; Matthew Cushing, treasurer; Lawrence A. Foley, assistant treasurer; and Rev. Victor V. Sawyer. The salaried executive director is Frank C. Hendry.

The Authority has under its supervision three projects in active operation, and a fourth that has been authorized and was well advanced in the planning stage as the year ends.

In active operation are: One, the so-called temporary project on Pond street and Cleverly court, 144 units; Westacres in West Quincy, 36 units; and Snug Harbor in Germantown, 400 units. Authorized and now in the planning stage is Riverview, also in Germantown, 180 units.

The temporary project includes 12 buildings of the barrack type, each containing 12 apartments. Title in these buildings, set up here by the federal government, was relinquished by the federal government to the city through the Housing Authority on January 31, 1950.

Operations for the period of February 1 to December 31 reflected a net surplus of \$18,472.15, which was turned over to the city. Due to the type of construction and the age of these buildings, the Authority pointed out, maintenance and upkeep will be rather heavy in the future. The exterior of all 12 buildings were repainted in 1950.

By the end of the year 50 percent of the veterans and their families who were living in these temporary units on the first of the year had moved to Snug Harbor, and the apartments they had vacated were filled by other veterans' families.

The 36 permanent units at Westacres, constructed under Chapter 372 of the state law, were completed in November, 1948. They are rented to veterans at \$50 a month. The year of 1950 reflected a net surplus of \$16744.98, which was turned over to the city, which had built the project with a bond issue.

Quincy Houses Its Veterans

FOUR FAMILY UNIT AT WESTACRES

Occupancy turn-over at Westacres was low, with an occupancy rental during the year of 99.42 percent. Upkeep and maintenance costs were low. The Authority points out that within two or three years it will be necessary to repaint all exteriors and some interiors.

The Snug Harbor project, erected with state aid in accordance with Chapter 200 was 99.5 per cent complete at the end of 1950, the uncompleted portion consisting merely of some road building, curb installation and landscaping.

First of the seven zones was open for occupancy on August 15, and by the end of the year all zones were completed and 381 families had moved in.

Rentals are based in accordance with the income and size of the family. A small family, consisting of less than three minor dependants, pays 19 percent of the veteran's income. The maximum income for admission for a small family is \$3,650; and this income can increase for continued occupancy until it reaches \$3900. A large family, consisting of three or more minor dependents, pays 15 percent of the veteran's income as rent. The maximum income for admission of a large family is \$3,950; this may increase to a maximum of \$4,200 for continued occupancy.

Snug Harbor, built on the site of the old sailor's home bearing that name, consists of 100 frame houses, each containing four dwelling units. Apartments are of three sizes: 220 are two-bedroom units; 160 are three-bedroom units, and 20 are four-bedroom units.

Snug Harbor is not subject to municipal taxation; but the Housing Authority pays the city five percent of the rentals in lieu of taxes.

The fourth public housing project in Quincy is the Riverview development, to be built with federal aid through the Public Housing administration. It will contain 45 family buildings, generally similiar to the houses in Snug Harbor, and it will be built on a site adjacent to the latter. Edward J. Shields, architect who designed both Westacres and Snug Harbor was retained to design plans for Riverview, and it was expected that the contract for construction would be let in the Spring of 1951.

Riverview will be the first public housing project in Quincy in which non-veterans are eligible as tenants. However, veterans will be given the priority and officials of the Housing Authority are of the opinion that there will be a sufficient number of qualified veterans seeking admission to fill the project. There will be a ceiling on income for those eligible to admission.

Completion of Riverview will give Quincy 760 single-family units of public housing, of which 144 are temporary units slated for demolition within a comparatively few years.

## CITY AUDITOR

To the City Manager and the Honorable City Council:

I submit herewith the financial report of the City of Quincy for the year ending December 31, 1950.

In compliance with Section 50, Chapter 41 of the General Laws, there is appended a certificate under oath with reference to the verification of cash balances in the hands of the City Treasurer and various other Trustees having custody of funds.

Respectfully,

ALEXANDER SMITH,

City Auditor

February 28, 1951

I hereby certify that I have verified, by actual count of cash and verification of bank balances, the cash of the City Treasurer, the Board of Managers of the Adams Temple and School Fund, the Board of Managers of the Woodward Fund and Property, the Trustees of the City Hospital of Quincy, and the Trustees of the Thomas Crane Library.

ALEXANDER SMITH,

City Auditor

Norfolk SS:

Subscribed and sworn to before me this day.

DOUGLAS A. RANDALL,  
Notary Public

ANNUAL  
APPROPRIATIONS

1950
